## ***Vision***

*All children and young adults will develop a connection to nature that will guide them in protecting the earth. And as adults, they will realize the quality of our Earth's environment is a reflection of the quality of our own character.*

## ***Mission***

*To offer children, young adults, and adults settings to observe, study, interact with, and be inspired by nature, and to awaken in them their "sense of wonder" so they may experience the Earth as naturalists, be compelled to understand the Earth as scientists, and be driven to protect the Earth as stewards.*

A photograph of a garden scene. In the center, a large, light green cabbage is visible, surrounded by various green plants and tall grasses. Several bright red flowers, likely Salvia, are in bloom, with some buds still forming. The overall scene is lush and green, suggesting a healthy garden environment.
